Danyal Sarwar

Full-Stack Developer · MERN / Next.js · AI/LLM Integration
danyalsarwar1240@gmail.com · 0312-7670702 · LinkedIn · GitHub · Portfolio

SUMMARY

I am a Software Engineering student having 1+ years of experience building production MERN/Next.js applications. Skilled at shipping full-stack features fast — from REST API design to responsive UI. Hands-on with LLM integration, and voice APIs..

EDUCATION

BE Software Engineering · National University of Sciences and Technology (NUST) Sept 2022 – May 2026
CGPA: 3.54 / 4.0 · Islamabad, Pakistan

EXPERIENCE

Software Developer · TechCognify Dec 2025 – Present

- Building production features in Next.js 14 + Express.js; contributed to 3 shipping modules within the first month.
- Developed REST APIs with optimized MongoDB queries and responsive Tailwind CSS UIs, cutting page load time by ~20%.

AI Intern · ITSOLERA Jun – Aug 2025

- Trained scam-profile detection model (87% accuracy) and built a computer vision inventory surveillance system using OpenCV.
- Developed multi-modal agricultural risk scoring pipeline; surfaced results via React dashboards for non-technical stakeholders.

Web Developer · Disruptive AI Jun – Sept 2023

- Built React dashboards from Figma designs; improved user engagement by 25% and cut redundant API calls by 40% via caching.
- Resolved 15+ critical bugs with backend team, unblocking the production release on schedule.

PROJECTS

RetailFlow — Garments ERP | Next.js 14 · TypeScript · MongoDB · Tailwind CSS

- Full-stack ERP managing 500+ SKUs across production departments; barcode scanning cut stocktaking time by 60%.
- Automated payroll system based on job costing, replacing manual Excel workflow for 20+ workers.

AICommerce — AI-Powered eCommerce | Next.js · Groq API · AssemblyAI · Google TTS · MCP

- LLM-driven conversational store management + voice navigation via AssemblyAI speech-to-text and Google TTS.
- MCP protocol for CRUD operations reduced boilerplate API code by 35%; deployed on Vercel with sub-2s cold starts.

Healthcare Appointment System | Next.js · Node.js · PostgreSQL · JWT · REST APIs

- Built fully responsive multi-role portal for patients and doctors with real-time calendar booking.
- Integrated JWT authentication and RBAC for secure, role-based patient/doctor access control.
- Designed and exposed REST APIs to improve booking request efficiency and scalability.

Chrome Autofill Extension | JavaScript · Chrome Extensions API

- Extension automating web form-filling via content scripts; supports 5+ profile slots with a custom popup management UI.

SKILLS

Frontend: React.js, Next.js 14, TypeScript, Tailwind CSS, shadcn/ui, Material UI
Backend: Node.js, Express.js, FastAPI, Langchain, REST APIs
Databases: MongoDB, PostgreSQL, MySQL, Supabase
AI/ML: LLM APIs (Groq/OpenAI), AssemblyAI, scikit-learn, OpenCV, MCP
Tools: Git, GitHub, Vercel, Postman, VS Code, Agile/Scrum, Docker, AWS (EC2, S3), CI/CD (GitHub Actions)
