Objective

MERN Stack Developer having ML experience in building scalable web applications and developing machine learning solutions. Skilled in modern JavaScript frameworks, backend APIs, and data-driven problem

Machine Learning Intern at IT SOLERA Pvt.Ltd

06/2025 - present

- Collected, cleaned, and preprocessed datasets for predictive modeling.
- Developed and evaluated ML models to solve classification and detection problems.

Web Developer at Disruptive AI

06/2023 - 09/2023

- Enhanced web application performance by optimizing API calls and frontend rendering. Managed tasks, prioritized features, and met deadlines.

Education

BS Software Engineering (2022 - Present) | NUST, Islamabad | CGPA: 3.51

Skills

Frontend: HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, React.js

Backend: Node.js, Express.js, REST API, Fast Api, Python

Databases: MongoDB, MySQL

ML Tools: Data preprocessing, Scikit Learn, Data visualization, EDA, Model Training

Version Control: Git, GitHub

Projects:

Styles_Sphere E-Commerce Application (React.js, Node.js, MongoDB)

A fully functional E-commerce platform with user authentication, product management, and checkout .

HealthCare Appointment System Using NextJs

Created a responsive website for smooth Patient Experience .

WeatherForecast System in React Js

Created a weather application using openweather Api for real time data
